PROJECTS

NGPT — Neural GPT Custom LLM Interface

Aug 2025 – Present

Python · LLaMA 2 · GPT-Neo · RAG · DuckDuckGo · GitHub

- ▶ Designed and built a custom LLM chatbot interface integrating Meta AI's LLaMA 2 alongside GPT-Neo for retrieval-augmented QA
- ▶ Combined deep conversational abilities from LLaMA with knowledge-grounded retrieval for versatile AI interactions
- ▶ Implemented DuckDuckGo web-search grounding to provide real-time, factual responses beyond the model's training data

MAT-CHA.AI — Startup × Creator Matchmaking Platform

Jan 2026 – Mar 2026

Python · FastAPI · React · AWS Amplify · DynamoDB · Bedrock · Team of 4 (AWS 'Build For India' Hackathon)

- ▶ Built an AI-driven matching system bridging Content Creators and Startups, enabling intelligent collaboration discovery
- ▶ Architected on AWS: S3 + Lambda for serverless processing, DynamoDB for data, Bedrock for AI embeddings, Amplify for hosting
- ▶ Shipped a live product within hackathon constraints; system scored high on relevance and deployment quality

TERRA-X — Real-Time Global Scenario Simulation Lab

Jan 2026 – Feb 2026

Python · FastAPI · React Three Fiber · Groq LLaMA 3.3 · Three.js

- ▶ Created a 3D Earth visualization interface where users input coordinates and parameters to simulate AI-projected global outcomes

- ▶ Backend powered by Groq's LLaMA 3.3 (ultra-low latency) with real-time weather data grounding for scientific accuracy
- ▶ Frontend built with React Three Fiber for interactive globe rendering; deployed live on GitHub Pages

Emotion-Aware Code Debugging Assistant

Dec 2025

Python · OpenCV · MediaPipe Face Mesh · DeepFace

- ▶ Built a real-time computer vision system monitoring facial landmarks — blink rate, head posture, screen proximity, and emotion — to estimate developer frustration
- ▶ Computed normalized frustration score; logged behavioral metrics per source file with live visual overlays as alerts
- ▶ Applied DeepFace for emotion recognition; integrated seamlessly as a background process during active coding sessions

ZigNGPTv1.0 — Language Model in Zig

Jun 2025 – Mar 2026

Zig Programming Language · Systems Programming · ML Fundamentals

- ▶ Wrote a language model from scratch in Zig — a low-level systems language — demonstrating deep understanding of model internals
- ▶ Focused on memory-safe, high-performance inference with manual memory management and zero-cost abstractions

Smart Mobility Companion — AI Bus Route Optimizer

Jul 2025 – Sep 2025

Python · GPT-2 · LLaMA · Hugging Face · Automation

- ▶ Built a generative AI system for bus routing, fare estimation, and timeline insights for public transit users
- ▶ Hybrid architecture: GPT-2 backend for structured data processing and LLaMA for conversational front-facing responses
